How do I Contact Air technical support?

How do I contact Air Technical Support and Air Warranty Claims? Phone: Call 1-800-483-4981 select option 3 then press 1 or call 1-800-247-7378 Email: AirPS@irco.com Can't find what you're looking for?

What if I can't solve my air compressor problems?

If you aren't able to solve your air compressor problems, including anything not mentioned above, we welcome the opportunity to have a look at your machine. Call Antler Pumps at 212-534-2500, or schedule an appointment online with our easy contact form.

How do I know if my air compressor is leaking?

Shut off the compressor while fully charged. If the gauge drops, you have an air leak. Disconnect the hose after performing the steps above. If the gauge stops dropping, you know the hose is the leaky element. Just like checking for a leak with a vehicle tire, you can apply liquid soap around connections and couplings to see if bubbles appear.

How do I know if my air compressor oil is low?

Be certain you are using the right oil as well, double-checking the viscosity. Finally, don't use your air compressor on a tilt. When it's not in a level position, it can trick the machine into thinking the oil is low because it all flows to the lowest spot in the receptacle.

What should I do if my compressor won't start?

Make sure the contact is good between the power switch and internal circuitry. Sometimes switches need tightening due to vibration, and old switches may need replacement. Sometimes changing the pressure can also get your compressor to start again if the automatic run sensor cut power temporarily.

What should I do if my compressor vibrates too much?

Compressor vibrating too much: tighten mounting bolts, and make sure the surface is level. Belts wearing out too quickly: adjust the tension up or down accordingly. Constant overheating: use in a well-ventilated area and keep up routine professional cleaning.

Discover US Air Compressor's industrial-grade rotary screw air compressors, known for their reliability, efficiency, and energy-saving features.
