

Outer packaging accessories

What is outer packaging?

Outer packaging simply put is the outer protection of a composite or combination packaging. Placed inside the outer packaging would be the inner receptacles or inner packaging for example glass bottles, as well as any absorbent or cushioning material needed to contain and protect the inner (s).

What is strong outer packaging?

Definition: Strong outer packaging from 49 CFR § 171.8 | LII / Legal Information Institute Strong outer packaging Strong outer packaging means the outermost enclosure that provides protection against the unintentional release of its contents.

What type of packaging is suitable for shipping dangerous goods?

UN approved 4G, 4GV & 4DV outer packaging, suitable for shipping dangerous goods via air, road or sea. Add inner packaging for combination packaging.

What are the different types of dangerous goods outer packaging materials?

There are various dangerous goods outer packaging materials and types available. At Air Sea Containers we have a range of UN Approved Outer Packaging, 4G, 4GV & 4DV, our inners can be found on our Inner Packaging page. Our 4G fibreboard outer packaging range are robust fibreboard boxes which have been tested with the use of specific inners.

Can 4G outer packaging be used with the tested inners?

The 4G outer packaging has therefore been certified to be used with the tested inners only. You can also use some of our specific outer packaging for liquids. There is a complete list of all approved inners on the specific 4G product page. Weight allowance explained.

Can 4GV fibreboard boxes be used with non-specific inner containers?

Our 4GV fibreboard outer packaging range are again robust fibreboard boxes, yet, these can be used with 'non-specific inner containers', meaning you are free to choose your preferred suitable inner for use in the 4GV outer packaging in accordance to the relevant transport regulations.
